

Technical Sheet

Renovent Sky 300 (Plus)

The Brink Renovent Sky 300 is a ventilation unit with heat recovery with an efficiency of 95%, a maximum ventilation capacity of 300 m³/h and low-energy fans.

Features Renovent Sky:

- steplessly adjustable air flow rates through a control unit (supplied with appliance).
- filter indication on the control unit / multiple switch.
- a completely new intelligent frost protection system which ensures that also at low outdoor temperatures the appliance's performance remains optimal and that, if necessary, it activates the optional preheater.
- low sound level
- comes as standard with automatic bypass valve
- constant flow control
- low energy consumption
- high efficiency

Renovent Sky 300 is available in two types:

- **"Renovent Sky 300"**
- **"Renovent Sky 300 Plus"**

Compared to the Renovent Sky 300, the Renovent Sky 300 Plus has a more extensive control board which increases the connection options.

These installation instructions describe both the standard Renovent Sky 300 and the Renovent Sky 300 Plus.

With the aid of the supplied mounting brackets, the Renovent Sky 300 (Plus) can be mounted either on the wall or on the ceiling. For the correct position of the connection ducts and dimensions see page 5.

When ordering an appliance always state the correct type; subsequent conversion to a different version is highly labour-intensive.

The Renovent Sky 300 comes ready to plug in with a 230 V mains plug.

The appliance comes as standard with a control unit, but connection of a simple 4-way switch is possible as well.

If a 4-way switch is installed instead of a control unit, the settings of the appliance can only be changed with a laptop!

Connecting a combination of control unit and multiple switch is another option.

Technical information

Renovent Sky 300					
Supply voltage [V/Hz]	230/50				
Protection degree	IP30				
Dimensions (w x d x h) [mm]	1185 x 644 x 310				
Duct diameter [mm]	Ø150 / Ø160				
External diameter condensate discharge ["]	3/4				
Weight [kg]	37				
Filter class	G4				
Fan setting (factory setting) - control unit					Max.
4-way switch		1	2	3	
Ventilation capacity [m³/h]	50	100	150	225	300
Permissible resistance ducts system [Pa]	3 - 6	11 - 26	25 - 58	56 - 129	100 - 230
Rated power (excl. optionel preheater) [W]	8,7 - 9,1	14,9 - 16,3	25,7 - 31,7	57,8 - 77,8	116,1 - 162,9

Passive House Certificate: Renovent Sky 300

 Passive House Institute
 Dr. Wolfgang Feist
 64283 Darmstadt
 GERMANY

Certificate
 Certified Passive House Component
 For cool, temperate climates, valid until 31 December 2013

Category: Heat recovery unit
 Manufacturer: Brink Climate Systems B.V.
 7951 – DA Staphorst, NETHERLANDS
 Product name: Renovent Sky 300

Certified for air flow rates of
66 – 226 m³/h
 Heat
85 %
 Electric power consumption
0.31 Wh/m³

This certificate was awarded based on the following criteria:

Thermal comfort	R _{supply air} ≥ 16.5 °C at R _{supply air} = -10 °C
Effective heat recovery rate	η _{heat} ≥ 75 %
Electric power consumption	P _{el} ≤ 0.45 Wh/m ³
Airtightness	Interior and exterior air leakage rates less than 3 % of nominal air flow rate
Balancing and adjustability	Air flow balancing possible: yes Automated air flow balancing: yes
Sound insulation	Sound pressure level L _p = 35 dB(A) based on a 4 m ² equivalent absorption area not met Here L _p = 47.8 dB(A) Unit should be installed so that it is acoustically separated from living areas
Indoor air quality	Outdoor air filter at least F7 Extract air filter at least G4
Frost protection	Frost protection for the heat exchanger with continuous fresh air supply down to R _{supply air} = -15 °C

Further information can be found in the appendix of this certificate.
